EDUCATION

University of Central Florida

Orlando, FL

B.S. Information Technology - College of Engineering and Computer Science

December 2025

Relevant Courses: Data Structures and Algorithms, Machine Learning, Object-Oriented Programming, Robot Vision, Web Development, Economics, Statistics, Computer Science 2

WORK EXPERIENCE

The Walt Disney Company - Orlando, FL

January 2026 - Present

Product Strategy Intern (Python, Excel, Streamlit)

- Authored product requirements gathered across a team of 8, scoping a Streamlit forecasting tool built through AI-assisted development to cover 40+ characters across 4 parks and cut 6 hours of analysis per quarter
- Shaped strategic vision with runDisney for 3 race formats each FY to conduct market research, align concepts with company goals and market trends, and iterate on partner feedback into a race roadmap

User Experience Strategy Intern (SQL, Snowflake, Tableau)

- Identified a 0-to-1 monetization opportunity across 25 Disney resorts via data-driven insights from 220K Guest passes, finding 30% used for off-label access and scoping a paid concept for Resort Ops
- Led data analysis into root-cause drivers of Guest call volume by querying 1M+ call records in SQL and Snowflake, translating top 3 pain points into prioritized CX roadmap items and cutting report turnaround by 65%

Kogna.IO - AI Startup - Remote

September 2025 - December 2025

Associate Product Manager Intern (Jira, Figma, Canva)

- Partnered cross-functionally with engineering and growth to launch Nodes, a modular workspace, developing features via user stories and Figma prototypes, driving 60% of accounts to connect 2+ nodes in 3 months

NBCUniversal - Orlando, FL

August 2024 - August 2025

Product Manager Intern (Jira, Salesforce, Tableau, Excel, PowerPoint)

- Scoped Fandango FanClub's MVP by analyzing competitor offerings, writing user stories in Jira and aligning OKRs through internal communications with marketing, launching a paid membership in an \$8.7B market
- Led 1,000+ participant user research to scope a scalable mobile redesign for SportsEngine, a 3M-user youth sports platform, taking it from discovery to launch with engineering and design and driving adoption among 150K+ users

Data Science Intern (SQL, Python, Excel)

- Drove feature optimization and dynamic thresholding for machine learning models by partnering with engineering through each stage of the development lifecycle, delivering a 15% improvement in forecast accuracy
- Automated reporting and real-time AI-driven prediction pipelines across 3,500+ facilities using Python and Excel, reducing reporting latency from 14 days to live dashboard visibility

LEADERSHIP

President (Loop - Product Management Club)

January 2025 - December 2025

- Designed leadership development programs on product lifecycle, user research, and AI tools, coaching 60+ students and attracting 5+ tech industry speakers
- Spearheaded software development of the Loop club website, translating Figma mockups, CMS content, and API data into Jira-managed sprints and scoping level of effort to ship a platform serving 35+ members

SKILLS

Programming Languages: SQL, Python, Java, HTML

Tools: Snowflake, Tableau, Excel (Advanced Analytics, Automation & Macros), Salesforce, Jira, Confluence, Figma, Microsoft Office Suite (PowerPoint, Excel), Keynote, Copilot, Claude

Skills: Documentation, Creativity, verbal and written communication, Product Strategy, Agile Ceremonies, Forecasting, GTM Strategy, Product Lifecycle Management, User Research, Data Visualization, Prioritization Frameworks, Cross-Functional Communication, Requirements Gathering, Competitive Analysis, Storytelling
